

Ampetronic™ Loopworks™ suite of tools includes a powerful Design tool, Measure app, comprehensive training materials and direct access to our friendly and knowledgeable support team.

The combined tools within provide a holistic end-to-end solution to your Hearing Loop projects that will save you time and money and showcase your standing as a Hearing Loop expert.

Loopworks™ Measure

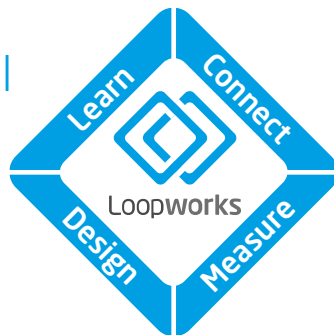

Consisting of the Loopworks Measure R1 Receiver, an iOS App and the Loopworks™ online productivity suite, Loopworks™ Measure enables you to test the functionality of a Hearing Loop and performance against standards in the field, store and share the results online and issue reports and system certificates.

Loopworks™ Design

Design, quote and deliver first-class Loop systems with free online access to Ampetronic's expertise and the worlds only complete loop measurement and design generation tools.

- Design Ampetronic™ quality hearing loops in minutes, without charge
- Access Ampetronic™ expertise and support whenever and wherever you need it
- Simplify quotation, ordering and installation
- Access projects and data remotely, anytime, anywhere

Simple, powerful
functionality at
your fingertips

Installer training, CPD courses and seminars

Ampetronic has over 100 years of combined engineering experience, dedication to our customers and commitment to Assistive Listening standards. You can be sure we will provide all the support and training needed to get the best possible results from your Ampetronic systems.

Ampetronic CPD training services are designed to provide technical and general awareness for end-users, clients and consultants, as well as a foundation for the professional installer and systems integrator.

We take pride in the quality and relevance of our technology and product training courses. More than 96% of our attendees rated their experience as either good or excellent.

Our team of experts are available as speakers for audiology and hearing loss conventions. Ampetronic can also provide information and educational support for charity events.

Available courses and materials:

Equality of access for people with hearing loss

We offer free educational CPD seminars for general awareness and sales team training on equality of access. Seminars are available at a venue of your choice with one of our expert engineers or via an online webinar.

Hearing loop installer training

For audio-visual professionals, electricians and others interested in specifying, installing or testing Loops. Ampetronic provides full day, in-house, training courses covering all aspects of Hearing Loop systems.

For more information on Ampetronic training CPD courses and seminars please contact our friendly and knowledgeable team on:

Equality of access for people with hearing loss

- User experience
- Legislation
- Principles of assistive listening technology and hearing loops

This seminar covers why assistive listening is necessary, why Hearing Loops are the preferred choice, what type of systems are available, suitable applications and why all assistive listening systems should be frequently tested.

Learning outcomes:

- Understand the need for assistive listening systems
- Legal requirement for assistive listening systems
- Available assistive listening technologies
- Assistive listening applications and technology suitability
- Hearing loop principles and operational standards
- Hearing loop system design variations and considerations

Running time: 45-60 minutes

Location: On-site: by appointment - call: +44 (0) 1636 610062
or email: sales@ampetronic.co

Cost: Free
Includes a free lunch

Hearing Loop installer training

- Hearing loop principles
- Hearing loop installation
- Commissioning and testing
- Troubleshooting

This course is designed to take you through the principles of assistive listening. Installer training includes an overview of why these systems are needed, general theory on how they work, and installing, commissioning and troubleshooting Hearing Loops. The course will also help you to ensure a standard compliant provision is in place.

Learning outcomes:

- Understand the need for assistive listening systems
- Understand how hearing loops work
- Hearing loop solutions
 - Perimeter loops
 - Loss Control Multi-Loops™
 - Low Spill Multi-Loops™
 - Counter loops
- Performance standards
- Installing and commissioning a hearing loop
- Interpreting designs
- Cable types, feed cables and signal cables
- Install tips and common faults
- Metal loss testing

Running time: 09:00 - 16:30

Location: Ampetronic head office, Newark
